

DATA SERVICES – COVERAGE, CAPABILITIES AND EXPERIENCE

Eutelsat's 26 Satellites - with orbital positions between 15 degrees West and 75 degrees East

Eutelsat America Corp. is a US based company established to serve the needs of the North American market. Eutelsat America Corp. offers a wide range of Broadband and data solutions to support government services, oil and gas industries, and enterprise customers. Our services can be offered as space segment only or as a complete data service solution.

Eutelsat's satellites have excellent coverage of Africa, Middle East (including Iraq), Southwest Asia (SWA - including Afghanistan) and Europe. In 2010, we will be launching KA-SAT, with our Tooway™ next-generation broadband, bi-directional, DSL-like service that is a faster and more flexible data service into small antennas, at very competitive prices to terrestrial providers. Eutelsat America provides a complete line of data services through Skylogic (a Eutelsat company). Through Skylogic's (Turin, Italy) D-STAR product family, Eutelsat America

can package bandwidth solutions that are specifically geared towards broadband access, LAN interconnection and IP multicasting. Our services provide one or two way connectivity that includes space segment, point-to-point connectivity, Internet connectivity and installation through our established network of ground operators. We build and integrate networks using our ViaSat hubs as well as other established hardware vendors such as Comtech and iDirect. We are one of the largest operators of data hubs in the world, with over 8000 active terminals deployed.

Some of the many applications being run on our fleet today include VoIP transport (telephony), distance learning, telemedicine, and disaster recovery. Our solutions are quick to deploy and bandwidth can be easily upgraded.

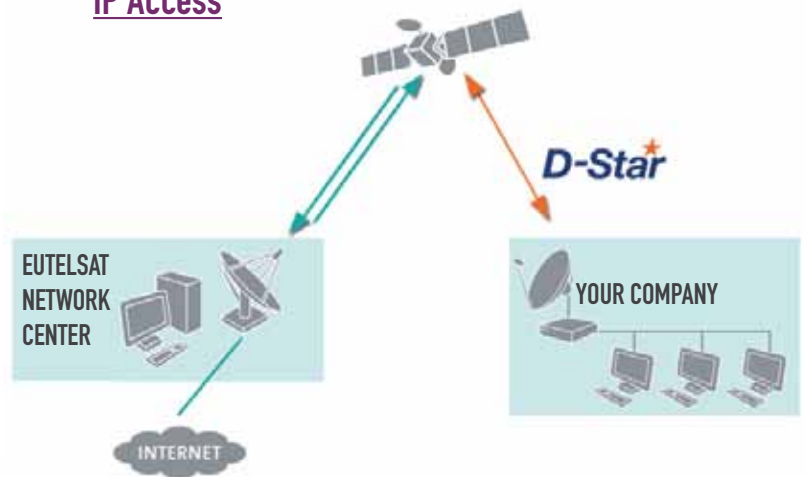

Broadband services via satellite

DATA SERVICES – COVERAGE, CAPABILITIES AND EXPERIENCE

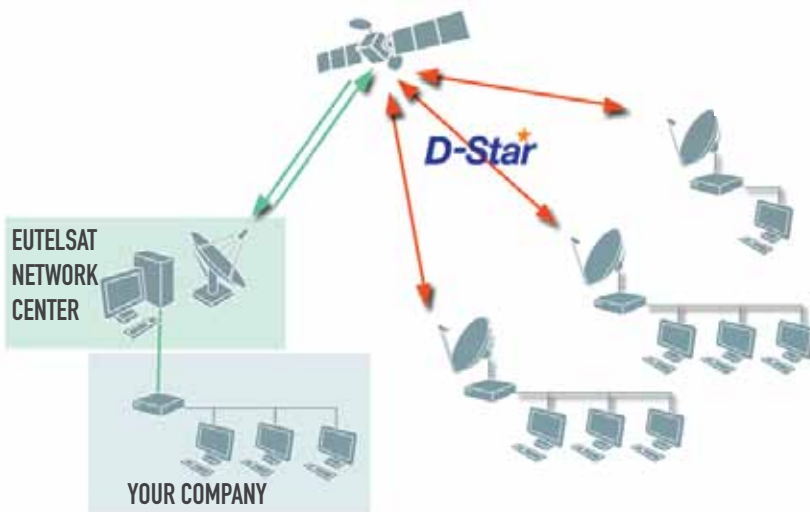

APPLICATIONS

- :: Broadband Internet Services
- :: Intranets and Extranets
- :: Virtual Private Networks
- :: Multicasting
- :: Distance Educations
- :: File Transfer
- :: Digital Media Streaming

IP Access

Corporate Networking

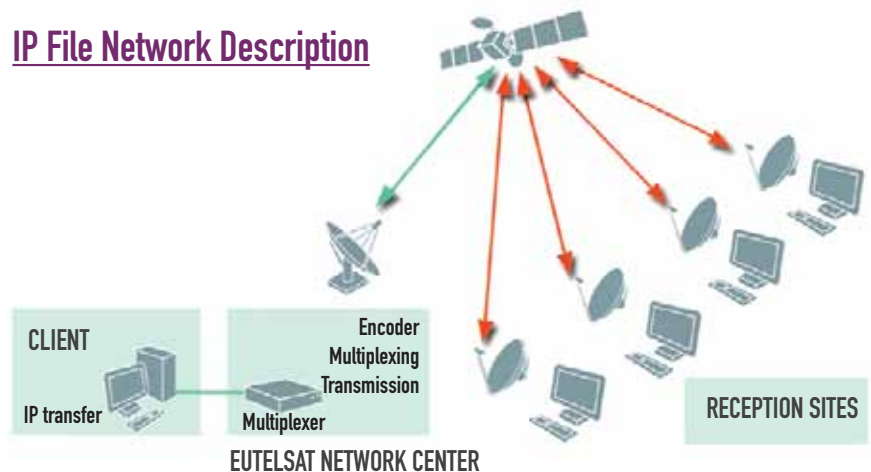

FEATURES

- :: Low Cost Fully Interactive Satellite IP Terminal
- :: Broadband Satellite Return Channel
- :: Return Channel Efficiency Enhanced with DVB-RCS Turbo-Coding
- :: Available in C or Ku Band Configurations
- :: Small Antennas and Low Power Outdoor Units

THE EUTELSAT ADVANTAGES

- :: Secure, reliable solution
- :: Extend geographic connectivity
- :: Scalable solutions
- :: Keep your existing network architecture
- :: Complete satellite VPN or VPN extension
- :: Support for satellite-only networks or hybrid networks
- :: Distributed or centralized Internet access
- :: Global availability
- :: Standard end-to-end solutions
- :: Operational excellence through knowledge and expertise
- :: Round-the-clock customer support
